More money for bridge on Ada Ciganlija

Mon, 27 Sep 2010

The Assembly of the City of Belgrade decided yesterday to increase the funds for the construction of the bridge on Ada Ciganlija and access roads by about 6.2 billion dinars.

The aim is that the works be accelerated. The funds are provided from loans and through redistribution of the building land regulation funds.

The initial plan was that 12.2 billion dinars be invested in the construction of the bridge across the Sava, while the funds for that purpose now amount to 18.4 billion dinars.

The board members also made the decision at the yesterday's session of the City Assembly on the formation of the Agency for European Integrations and Cooperation with Associations.
